Introduction

The T-BOSIET will introduce delegates to the specific safety issues and regimes relevant to offshore installations, and to equip them with the basic emergency response knowledge and skills for travelling to and from offshore installations by helicopter in a tropical environment.

Target Group

The T-BOSIET program is designed for personnel who are new to the offshore oil and gas industry in a tropical environment.

Course Overview

This program introduces and describes the core competence and safety training requirements that are relative to all the tropical warm water operating areas of the offshore oil and gas Industry.

Learning Modules:

- ◆ Safety Induction
- ◆ Self Rescue and Fire Fighting
- ◆ Sea Survival and First Aid
- ◆ Helicopter Underwater Escape Training

**The theory element of the course can be accessed online (instead of going to the center to take classroom session). You will only have to attend 1 day practical at the training center.*
