

Basic Scaffolding Refresher

Duration: 2 Days

Course Size: Maximum 10 per Class

Rate: 9,000 THB + 7% VAT

Introduction

Scaffolding is a major element in a larger arena of safety that OSHA calls, "Fall Hazards." A fall hazard is anything at your worksite that could potentially cause you to lose your balance or bodily support, resulting in a fall.

Target Group

This course is designed for construction workers who need to refresh their training on erecting, altering or dismantling scaffolding and associated equipment.

Course Overview

The Purpose of this course is to refresh the trainings and knowledge of existing scaffold and to reassess their competency following British Standard on erecting Scaffold.

Learning Outcomes
