

# WORKING and EVACUATION AT HEIGHTS

**Duration: 1 Day**

**Course Size: Minimum 6 Maximum 20**

**Rate: THB 10,000.00 + 7% VAT(per person)**

## Introduction

Employers must ensure that certain workers complete a working at heights training program before they can work at heights.

## Target Group

The target group for this programme are those who work at construction sites and or a workplace where one could fall a distance and cause injury to oneself or others.

## Course Overview

This program aims to provide knowledge to those who may be exposed to the hazard of falling and about fall hazards and general safety practices to work safely at heights.

During the training programme, delegates will be required to demonstrate their skills and understanding of the following key areas.

## Learning Modules:

- 📍 Definitions of Working at Heights
- 📍 Working at Heights Regulations
- 📍 Assessing the Risk associated when working at heights
- 📍 Hierarchy of Control for working at heights
- 📍 Fall prevention VS. Fall Protection
- 📍 Fall Protection equipment
- 📍 Working at Heights Safely
- 📍 Use of Personnel Descending Device

## Competency

Competencies of delegates are assessed during practical exercises.
